

HOW TO APPLY: EASY STEP-BY-STEP GUIDE

This easy to follow instruction guide is designed to provide you with the necessary information to correctly place the Exclusive Hair Inserts. If you have any questions, Original Diva recommends you consult your nearest stockist or visit our website: www.originaldivaextensions.com. Original Diva also recommends the use of sectioning clips and a tail comb to make the whole process easier.

Step 1: Apply the first 6" weft

- Create a horizontal part with a comb about 2.5cm (one inch) above the nape of the neck and secure loose hair with a clip;
- Position the first 6" weft along the hairline starting with the center insert and secure. The insert is secured by gently snap-opening the clip and applying a small amount of pressure on the insert to close; and
- Extend the weft on either side, making sure it lies flat against your head and secure the remaining inserts on both sides.

Step 2: Apply the 7" weft

- Release your own hair from the clip and create a horizontal part slightly above the first 6" weft and secure your own hair with the comb;
- Position the 7" weft along the new part starting with the center clip and secure; and
- Extend the weft on either side, making sure it lies flat against your head and secure the remaining clips on both sides.

Step 3: Apply the 8" weft

Follow the same process as Step 2 for the 8" weft placed slightly above the 7" weft.

Step 4: Apply the second 6" weft

Follow the same process as Step 2 for the second 6" weft placed slightly above the 8" weft.

INSTRUCTION GUIDE

Step 5: Apply the 1.15" weft

The 1.15" weft is designed to be placed on the side of your head to frame the face and in front of the 3" weft.

Follow the same process as Step 2 for the 1.15" weft with a horizontal part on the side of your head. Note: The 1.15" weft contains one clip only.

Step 6: Apply the second 1.15" weft

Position the second 1.15" weft on the other side of your head by following Step 7.

Step 7: Apply the 3" weft

The 3" weft is designed to be placed on the side of your head to frame the face.

Follow the same process as Step 2 for the 3" weft with a horizontal part on the side of your head. Note: The 3" weft contains two clips only.

Step 8: Apply the second 3" weft

Position the second 3" weft on the other side of your head by followings Step 5.

Removing the wefts

To remove a weft, snap open all the clips and gently lift up and away from your hair. Never try to remove a weft without opening the clips, as it may result in damage to your own hair.

CARE AND MAINTENANCE

Just like your own hair, these inserts need to be shampooed, conditioned and combed to remove tangles. It is recommended that you refer to our website: www.originaldivaextensions.com for our care and maintenance instructions. In addition, it is best to store the Inserts in plastic bags or its original packaging.
